

15.5 Foot x 150 Foot Roll Stock MIL-PRF-131CL I Foil Barrier Material

Short On Time? Multiple Machine & Skid Sizes? Pre-Fabricated Covers Too Expensive?

15.5 Foot x 150 Foot MIL-PRF-131 Roll Stock drastically reduces fabrication labor on a job site or at your facility. All heat seals made by Heritage Packaging are created in a clean manufacturing environment using industrial grade, electronically temperature controlled, pneumatically actuated heat sealers assuring that all welds are hermetic. 15.5 foot x 150 foot roll stock can accommodate any size asset; from auto engines to entire aircraft. Your personnel will save large amounts of time by not having to produce as many long, manual heat seals with cumbersome hand-held equipment; while ultimately producing a higher quality finished product.
